

Interesting Tick Facts:

- After one blood meal, a tick can grow anywhere from 10 to 25 times its original size. Imagine growing into a 100-foot giant after eating lunch!
- Female ticks can lay anywhere from 2,000 to 18,000 eggs.
- Ticks are virtually blind and find their prey by sensing body warmth or by smelling breath.
- A tick uses a numbing agent in its saliva so that you don't feel its bite.
- Opossums and timber rattlesnakes can each devour up to 5,000 ticks a season.
- Ticks have been around since the time of T-Rex.
